Insurance: Mathematics and Economics 4 (1985) 297–298
North-Holland

Author Index Volume 4 (1985)

(The issue number is given in parentheses)

Albrecht, P., A note on immunization under a general stochastic equilibrium model of the term structure (4) 239–244
Andrews, G.H., Discussion of "Implications of population change on social insurance systems providing old-age benefits" by R.J. Myers (1) 9– 12

Beekman, J.A., A series for infinite time ruin probabilities (2) 129–134
Blazenko, G., Optimal indemnity contracts (4) 267–278
Boyle, P.P. and **R. Freedman**, Population waves and fertility fluctuations: Social security implications (1) 65– 74
Briys, E.P., Investment portfolio behavior of non-life insurers: A utility analysis (2) 93– 98

Delbaen, F. and **J. Haezendonck**, Inversed martingales in risk theory (3) 201–206
Deprez, D. and **H.U. Gerber**, On convex principles of premium calculation (3) 179–189
De Vylder, F., Non-linear regression incredibility theory (3) 163–172
De Vylder, F. and **M. Goovaerts**, Semilinear credibility with several approximating functions (3) 155–162

Eldor, R. and **Y. Kahane**, Currency options as theoretical and practical instrument in hedging the exchange risk in excess of loss reinsurance (2) 137–141

Freedman, R., see **P.P. Boyle** (1) 65– 74

Gerber, H.U., On additive principles of zero utility (4) 249–251
Gerber, H.U. and **K. Schuerger**, On the monotonicity of stop-loss premiums (2) 135
Gerber, H.U., see **D. Deprez** (3) 179–189
Goovaerts, M.J. and **R. Kaas**, Application of the problem of moments to derive bounds on integrals with integral constraints (2) 99–111
Goovaerts, M.J., see **F. De Vylder** (3) 155–162
Goovaerts, M.J., see **J.Th. Runnenburg** (4) 287–293

Haberman, S., Home responsibility protection and married women's pension rights (3) 207–224
Hadidi, N., A note on De Vylder's method of estimation of IBNR claims (4) 263–266
Haezendonck, J., see **F. Delbaen** (3) 201–206
Hansen, W.L. and **K.C. Holden**, Critical linkages in higher education: Age composition and labor costs (1) 55– 64
Heilmann, W.R., Tolerance intervals in risk theory (3) 173–177
Hickman, J.C., see **R.B. Miller** (1) 1
Hipp, C., Approximation of aggregate claims distributions by compound Poisson distributions (4) 227–232
Holden, K.C., Discussion of "Population projections for social security cost estimates" by John Wilkin (1) 29– 34
Holden, K.C., see **W.L. Hansen** (1) 55– 64
Hsiao, W.C., The future cost of Medicare and Medicaid (1) 47– 49

Jollie, W., Discussion of "The implications of demographic changes for publicly funded medical insurance costs" by D. McKusick, R. King and S. Mussey (1) 51– 53

Kaas, R., see **M.J. Goovaerts** (2) 99–111
Kahane, Y. and **Y. Kroll**, Optimal insurance coverage in situations of pure and speculative risk and the risk-free asset (3) 191–199
Kahane, Y., see **R. Eldor** (2) 137–141
Keyfitz, N., Current cost pension systems and intergenerational equity (1) 13– 19
King, R., see **D. McKusick** (1) 35– 45
Kremer, E., Finite formulae for the premium of the general reinsurance treaty based on ordered claims (4) 233–238
Kroll, Y., see **Y. Kahane** (3) 191–199

Lauwers, M., see **L. d'Ursel** (4) 279–285

Mack, T., The utility of deductibles from the insurer's point of view (2) 75– 79
McKusick, D., R. King and **S. Mussey**, The implications of demographic changes for publicly funded medical insurance costs (1) 35– 45
Miller, R.B. and **J.C. Hickman**, Editor's introduction (1) 1
Müller, H.H., Investment policies and reinsurance for pension funds (2) 123–127
Mussey, S., see **D. McKusick** (1) 35– 45
Myers, R.J., Implications of population change on social insurance systems providing old-age benefits (1) 3– 8
Myers, R.J., Response to "Current cost pension systems and intergenerational equity" by Nathan Keyfitz (1) 21– 22

Papatriandafylou, A., see **H.R. Waters** (2) 113–122
